SUMMARY

I am an enthusiastic and highly driven Computer Science Engineer. I excel in C++ programming and full-stack web development and am dedicated to career growth and innovation.

SKILLS

Languages: C++, SQL, Python, JavaScript, HTML, C.

Technologies: AWS, React.js, Node.js, Express.js, Flask, MySQL, SQLite, Docker, Kubernetes, MongoDB.

EXPERIENCE

- 11/2023 – Current **Software Developer Intern** Pype
- Worked on different technologies to self-host ML Models
 - Worked with Open Source projects such as Flowise to build UI for drag and drop LLM flow
- AWS / Flask / BentoML / Flowise
- 3/2023 – 4/2023 **Software Developer Intern** Dexlock
- Created use cases for the company project and loaded the data into different databases including MongoDB, PostgreSQL, and MySQL.
 - Developed and hosted the documentation website for the company project using Docusaurus.
- AWS / MySQL / MongoDB / Docusaurus / PostgreSQL
- 4/2022 – 7/2022 **Front End Developer Intern** Wealthisle Future Pvt. Limited
- Designed and developed the company website using React.js and hosted it on Firebase.
- React.js / Node.js / Firebase

PROJECTS

- React.js, Node.js, Express.js **ParaSum** Backend Developer
- Developed ParaSum, a Chrome Extension that generates and replaces texts in a website with its summary, allowing users to quickly grasp the main points or key information in lengthy articles, using Node.js, Express.js, and MongoDB.
- Vue.js, Flask, SQLite, Redis, Celery **Grocery Store V2** Full Stack Developer
- Developed a Grocery Store application that implements RBAC with 3 roles - User, Manager and Admin.
 - Each role have different functionalities. Users can view the available groceries, buy them, receive notifications and spending reports through email.
 - Manager accounts are responsible for managing the different sections and items in each section of the grocery store.
- React.js, Node.js, Express.js, MongoDB **Social Network App** Full Stack Developer
- Developed a Social Network App, a web application where users can search for other users, see their mutual friends, and connect with them, using React.js, Node.js, Express.js, and MongoDB.
- Flask, SQLite, CSS **Travelog** Full Stack Developer
- Developed Travelog, a web application where users can read the travel blogs of other people and post their own travel blogs including images, using Flask and SQLite.

EDUCATION

- 2020 - 2024 **Bachelor of Technology(B.Tech)** CGPA - 9.26
- Govt. Model Engineering College, Thrikkakara
- 2020 - ongoing **Bachelor of Science(BS)** Current Level: Diploma
- Indian Institute of Technology, Madras(IITM)

ACTIVITIES AND ACHIEVEMENTS

- Secured **Second Prize** in **Beach Hack 5**, an offline hackathon, organized by Christ College of Engineering, Irinjalakkuda.
- **Chairperson, FOSSMEC**, the Free and Open-Source cell of Govt. Model Engineering College.
- **Web Team Core, Excel 2023**, the annual techno-managerial fest of Govt. Model Engineering College.
- Attended **AWSome Day Online Conference**, a conference that introduced the various types of technologies and services of AWS.
- Completed a course on **Machine Learning** offered by DeepLearning.AI in association with **Stanford University**.
